Bachelor of Science in Information Technology

July 2025

Saint Louis College

Related Coursework: Database Systems, Management, Software Development

PROJECTS

Online Vehicle Management for Universal Leaf Philippines, Inc.

- Led the full-stack development of an Online Vehicle Management System capstone project, delivering a functional web application for efficient vehicle logistics and data management with HTML, CSS, JavaScript, PHP, and MySQL.

SpillTheBeans - Social Media Web App

- Personal project demonstrating advanced proficiency in full-stack web development with React, Tailwind CSS, and Appwrite (BaaS).

music.me - Music Recommendation App

- A sleek, user-centric music discovery platform designed to help listeners find their next favorite track. By leveraging React's component-based architecture and Tailwind CSS for styling, the app provides a seamless interface for exploring curated recommendations and personalized playlists.

EXPERIENCE

Information Technology Intern

Feb 2025 - May 2025

Commission on Elections (COMELEC) – Agoo

- Created and managed spreadsheets for tracking data and calculations using Microsoft Excel.
- Processed documents, assisted visitors and clients, and performed accurate data entry.
- Supported IT-related tasks, including checking connections, testing components, and replacing faulty hardware.
